Demonstration University / Academic Handbook

FICTIONAL DEMO DATA - NOT AN ACTUAL UNIVERSITY POLICY. Edition: Demonstration 1.0. This handbook exists only to demonstrate a course prerequisite assistant. Use your own university handbook for real academic questions.

The course catalog and registration rules appear on subsequent pages. Every page in this file has a PDF position that can be cited. Do not treat the absence of a statement as permission to enroll.

Foundation courses

CS101 - Programming Fundamentals. Prerequisites: None. This course introduces programming variables, conditions, loops, and functions.

MATH101 - Calculus I. Prerequisites: None.

MATH102 - Linear Algebra. Prerequisite: MATH101.

CS102 - Object-Oriented Programming. Prerequisite: CS101 with a minimum grade of C.

A prerequisite listed without a minimum grade requires a passing grade.

Intermediate computing courses

CS201 - Data Structures. Prerequisite: CS102 with a minimum grade of C.

CS202 - Database Systems. Prerequisite: CS102.

STAT201 - Probability and Statistics. Prerequisite: MATH101.

CS203 - Computer Organization. Prerequisite: CS101. Corequisite: CS203L.

CS203L - Computer Organization Lab. Corequisite: CS203. A corequisite may be taken in the same semester.

Artificial intelligence and advanced study

CS301 - Artificial Intelligence. Prerequisites: BOTH CS201 and MATH102. A passing grade is required in each. Completing CS101 alone does not satisfy these prerequisites.

CS302 - Machine Learning. Prerequisites: CS301 AND STAT201.

CS303 - Computer Vision. Prerequisite: CS302 OR written permission from the department chair.

CS401 - Final Year Project I. Prerequisites: completion of at least 90 credit hours AND approval of a project proposal by the departmental committee. This handbook does not specify a minimum CGPA for CS401.

Registration rules and missing information

Meeting course prerequisites does not guarantee a seat. Enrollment also depends on seat availability and timetable compatibility.

Prerequisite waivers require written approval from the department chair. No waiver should be assumed from a student's experience alone.

Transfer credit equivalence must be confirmed by the university registrar. This handbook does not list course-by-course transfer equivalencies.

The handbook does not provide next semester's timetable, current seat counts, tuition payment deadlines, or scholarship eligibility criteria. Contact the registrar for registration matters not specified here.
